

As a Data Engineer, we need crawling information from website such as food-delivery platform and even mobile application

Here are three platforms where you can **choose** one of them as your task

1. Tripadvisor(Simple)

Crawling more than 100 Bars in Shanghai from Tripadvisor

Example Data of Outlets in Netherland, see `tripadvisor_sample.csv`

2. Dianping(Normal)

Crawling more than 100 Bars in Shanghai from Dianping

Example Data of Outlets in Shanghai, see `dianping_sample.csv`

3. Xiaohongshu(Difficult)

Crawling more than 100 notes with keyword 上海酒吧

Example Data of notes in Shanghai with keyword 小黑瓶, see `xiaohongshu_sample.csv`

Please provide **code and data**
